

Douglas County Regional 10(a)(1)(B) Permit, and no action. The draft EA analyzes the onsite, offsite, and cumulative impacts of the proposed project and all associated development and construction activities and mitigation activities on the Preble's, other threatened or endangered species, vegetation, wildlife, wetlands, geology/soils, land use, water resources, air and water quality, or cultural resources. None of the proposed impacts occur within the riparian corridor. All of the proposed impacts are in upland areas outside of the 100-year floodplain. The Applicant, using the Service's definition of Preble's habitat, has determined that the proposed project would impact approximately 0.294 acres of potential Preble's habitat. The mitigation for the identified impacts may provide a net benefit to the Preble's and other wildlife by improving riparian habitat through planting of additional shrub vegetation.

The Preble's is the only known federally listed species that occurs on site and has the potential to be directly affected by the proposed project. The Applicant has agreed to implement the following measures to minimize and mitigate impacts that may result from incidental take of Preble's:

In order to compensate for the loss of Preble's habitat, a 0.59-acre area in the northeast corner of the property will be preserved and enhanced at a ratio of 2.0 to 1 by planting shrubs.

This notice is provided pursuant to section 10(c) of the Endangered Species Act. The Service will evaluate the permit application, the EA/HCP, and comments submitted therein to determine whether the application meets the requirements of section 10(a) of the Endangered Species Act. If it is determined that those requirements are met, a permit will be issued for the incidental take of Preble's. The final permit decision will be made no sooner than December 22, 2000.

Dated: November 15, 2000.
